

MadeYe Memorial Charitable Trust

Annual Report

2013-2014

MMCT

Regd no:311300877/30.03.2013

Regd office. At: kandhpali Para, P.O: Rajendra College, Balangir, Odisha. 767002 .

Cell :9709347968. E_mail [.mmcturst2013@gmail.com](mailto:mmcturst2013@gmail.com)

From the Desk of the Chairman Cum Director.

I am glad to share the first report of MMCT with you all. MMCT is established in memory of the late Ms. MadeYe, our only begotten daughter (DOB: 04.05.2002 & DOD:19.06.2007) with an intention to work with the poor people to empower them so that they can see smile on the faces of their daughters.

MMCT has a dream to make the society a child friendly and a better place for children. It is our burning desire to see all children especially girl children to smile always in their child hood, adolescence and step into their youth with lots of hope of achievement for self and contribution to the society and country. A country like India, which is growing very fast in all areas of development, has been witnessing the death of many children before the age of 5. Many children especially girl child who survive till 05 years of age fail to grow with all opportunities and cannot live a dignified life of a citizen of shining India

MMCT wants to see a transformed society where no parents or couples should think of abortion of their pregnancy.

MMCT wants to see that all parents and community to ensure that they take enough care of the new born baby so that all children especially girls and vulnerable children survive till the age of 5.

MMCT want to see that all children who have crossed the age of 5 and survived should be well cared. They should get nutritious food and should be treated all kind of sickness so that can grow healthy and enjoy good health till they attain the age of 18.

MMCT wants to see that no girl should marry before 18 years of age and are well prepared mentally and psychologically for marriage after 18 years of age. All girls should learn the art of living and need to learn essential skill which will help them to live a life with dignity, joy and peace.

MMCT has been working since 2008 informally but this report is first of its kind after the establishment of this Trust in memory of our late MadeYe. From the very beginning of interventions in the field of social work MMCT feels that all developmental activities can be possible effectively by means of group approach with full cooperation, contribution and participation of the people. For this special efforts had been taken up to enable the people to work in groups with their maximum participation, cooperation and contribution in all development programs.

During this year the organization extended its areas of operation to more than 20 villages of Kandhmal and sundargarh districts of Odisha .The organization also extended its activities in collaboration with the government and NGOs.

MMCT mainly works for the cause of children especially girl children and vulnerable children through socio economic, socio cultural & socio political development of the oppressed people. Literacy promotion, health and sanitation, women & child development and natural resource management are also line of work of the Trust. For this our organization had adopted motivational measures though mass meetings, trainings and so on.

We thank all our volunteers, board members, advisors, well wishers, people representatives, training experts, Government officials, collaborating agencies(NGOs) and the villagers in general of the operational area who gives us strength and inspiration to work ,cooperated strongly and coped with the stress in our growth and sustenance.

Mrs. Susmita Pradhan,
Chairman cum Director -MMCT

Our Vision

“Make World a better place for every girl child to live happily ”

Our Goal :

**Let every girl child "Born, Survive, Grow and Live " a life with
Happiness, Peace and Justice .**

Our Mission :

**To create a child friendly society and to bring lasting changes in the lives
of the girls and boys through Counseling , Assisting ,Empowering &
Advocacy .**

Our Core Values

We Love & respect all people .

We are honest.

We are committed to the vulnerable children.

We stand for truth.

MMCT has taken much care to see that all programs which will be implemented through MMCT should be child centered. Children should be at the center of all intervention whether it is a small or big programs. Prior to 2013 we have implemented programs randomly but this year we have developed the program strategically. All programs are designed in such way that it will contribute to the vision and the mission of our organization.

We want to see that parents should not be skeptical and feel that girl child is a liability for the family. All parents should feel happy to have girl child in their family to make the family a happy family and blessed family. Parents think that girl child is a curse to the family so they prefer for sex determination to take precautionary steps to get rid of girl child in family and MMCT is determined to educate the parents and community people about the contribution of girls and women to the family in particular and to society in general.

MMCT wants to see a transformed society where no parents or couples should think of abortion of their pregnancy.

MMCT wants to see that all parents and community to ensure that they take enough care of the new born baby so that all children especially girls and vulnerable children survive till the age of 5.

MMCT want to see that all children who have crossed the age of 5 and survived should be well cared. They should get nutritious food and should be treated all kind of sickness so that can grow healthy and enjoy good health till they attain the age of 18.

MMCT wants to see that no girl should marry before 18 years of age and are well prepared mentally and psychologically for marriage after 18 years of age. All girls should learn the art of living and need to learn essential skill which will help them to live a life with dignity, joy and peace.

RELATIONSHIP BUILDING

To carry out developmental activities it is very important for any development organization to build relationship with community people. The relationship building lays the foundation of the organization to work in the communities in partnership with community people. Development work which is initiated by external people is found a failure one and not sustainable. In order to win the people trust MMCT focused on individual family visit and spending as much as time with the mothers and girl children who are the primary target group of the trust. MMCT has been working in Balangir but it has extended its operation areas in Kndhamal, SUndergarh of Odisha state and Ranchi district in Jharkhand state.

NEW YEAR PICNIC WITH SLUM CHILDREN: Life in slum is very painful and children face its consequences. Children are deprived of many facilities and they struggle a lot. Their parents work as daily laborer .and mothers work as maid servants. Many times children do not

get proper food and found left alone at home. To give smiles on the faces of the girl children MMCT organized picnic for the slum girls. It was a time of recreation, fun and delicious food slum children. They enjoyed a lot and parents were very happy

to see that their children have a day out and this has created trust in their mind for MMCT as a result MMCT was well accepted by the people.

IMPROVED HEALTH

HEALTH AWARENESS CAMPS

Health is wealth. Health is the great asset to poor people .If poor man is physically sound then he can go for his daily labor work and earn money to run his family. If the children of poor man have good health then it saves their money for their treatment. MMCT wants to see that children are healthy and parents are not bothered for the health of the children...

In order to see that children enjoy better health and are not sick MMCT has organized health awareness camps in the villages and slums for parents where we have given awareness on the causes and prevention of various diseases mainly malaria, Diarrhea, scabies, cold and cough . MMCT has emphasized on behavioral changes and use toilets and not go for open defecation. Our volunteers have motivated the parents to take care of their children and particularly girl children so that they won't fall sick and be regular school. Mothers are motivated to give boiled water to children in rainy days to keep them away from diarrhea

We have seen the result of this awareness programs.

1. Parents are careful about their children health
2. Willingness to go to doctor for the treatment is noticed among the parents
3. Parents are focusing more on prevention. They are using boiled water,

HEALTH EDUCATION TO ADOLESCENT GIRLS

Health awareness program was one among the adolescent girls of kandhamal in kurmingia village and

they were given with lifeboy soaps just to encourage them for hand washing and regular bathe with soap. This had a good impact among the adolescent girls as they have started using soaps to bath regularly and for hand washing.

Mothers Training

on cleanliness was organized on 15 June 2013 at samlong akhada coach slum where 26 mothers were trained and vowed to aware other mothers on cleanliness as a volunteer and ensure that all women practice cleanliness.

In slums it is very difficult to maintain cleanliness yet the efforts of mothers was praise worthy and they started monitoring the women who was not maintaining cleanliness before

NUTRITION CAMPAIGN PROGRAM

Malnutrition is very common among the children below 5. The governments have many programs for the nutrition security of the mothers and children. In our target areas Anganwadi centers are running effectively but it has many challenges also . Poor infrastructure is one among them. MMCT has been continuously motivating the mothers to send their children to Anganwadi centers and to get themselves registered at Anaganwdi centers so that they can avail the benefit of the government and this has good impact as the mothers are now regularly sending their children to anganwdi centers .

HAND WASHING

Uncleanliness due to dirty hand is the reason for many diseases. MMCT has tried to bring behavior change among the children by teaching them regularly on hand washing, procedures of hand washing and benefit of hand washing.

Children in kandhaml and sundargarh district of Odisha

were taught hand washing. Children enjoyed a lot in the program as they have to go through the practical hand washing process.

All children gathered to learn the process of hand washing when the demo was given to them.

All children made a resolution that hence forth they will wash their hands regularly.

DISTRIBUTION OF CLOTHES TO POOR WIDOWS AND CHILDREN

MMCT as it is committed for the girl children development, distributed Sarees and clothes to 20 poor widows and children during pre Christmas celebration to show the love to other woman.

This was a great moments for those widows and they were filled with tears to acknowledge their gratitude as no one thinks about their plights and MMCT being a girl child organized has realized their need and provided with clothes to them

RELATIONSHIP BUILDING

To carry out developmental activities it is very important for any development organization to build relationship with community people. The relationship building lays the foundation of the organization to work in the communities in partnership with community people. Development work which is initiated by external people is found a failure one and not sustainable. In order to win the people trust MMCT focused on individual family visit and spending as much as time with the mothers and girl children who are the primary target group of the trust.

IMPROVED EDUCATION

Till now excepted percentage of literacy has not yet been achieved in rural areas and urban slum areas, despite several attempts have been made by the GO/NGOs. The root causes behind this are unawareness among the people in rural area as well as slum dwellers on value of education, lack of facilities, poor health status , inadequate communication facilities to all villages, insecure school building. Girl children education and adult education is totally negligible .The parents have apathetic attitudes in gender classification. Hence to enhance the momentum of total literacy the trust covered this topic in almost all sanitation programs being conducted in the operation area. The activities carried out during this reporting period are as follows.

1. Family counseling and mainstreaming of drop out /potential drop outs in education.
2. Public awareness meetings meeting
3. Mothers meetings
4. Sensitizing on gender equality in communities and schools\
5. Celebration of important days.

IMPACTS Noticed.

1. Illiterate parents are now becoming conscious on value education and are enrolling their drop out and potentially drop out children in formal and not formal education centers
2. .Mid day meal program functioning smoothly with the active involvement of the SHGS
3. Girl child literacy in the remote areas found improving.

Education is everything for children. Today children are engaged in other work so that they can extend their hands to their parents to add supplementary income to the family income. Due to poverty many children are engaged in rag picking, child labor and maid servant in rich people's house.

MMCT has been motivating the parents to send their children to school and not to engage them in any work where child will get wages and forget to go to school to learn and study.

Our chairman has visited the anganwadi centers and met with the anganwadi workers and talked the difficulties they are facing and praised for their sincerely in their job. The anganwadi

centers are functioning effectively and children are getting regular nutrition food in the centers.

We have met the children of jihoba nish children home and encouraged them to study properly.

Alice, Khusbu and neha 3 daughters of Mariyam a slum dweller . Marium is a maid servant in the lakhani enclave and earns Rs.1500/- per month which is not enough to feed the 3 daughters and the drunkard husband. Her husband always quarrel with Marium and snatches money

children before going to school

Children waiting in school to meet principal

School principal taking test of children

children are happy with school bag

children eating breakfast before going to school

3 children with our volunteer Mina John

Children inside school premises

Children in the class room after enrolment

Mariyam to drink alcohol .Marium has lost her elder daughter who was studying as a boader in a Christian mission hostel but unfortunately she fell down in a well and died in 2013 and Marium her mother was disturbed and broken. The 3 daughters were the worst victims of the alcoholism of their

father. Their father always beat them and the children could not continue their studies due to extreme poverty. The daughters were looking very dirty without proper bathe and combing their hair. They were engaged in rag picking. When this came to the notice of MMCT, our chairman Mrs. Susmita immediately met Marium and asked not to send the daughter for rag picking. Our chairman visited the local girl's school and talked with the school principal to enroll these 3 daughters. Even though initially the principal was not agreed but later when our chairman tried to convince the principal to give admission to these 3 girls so that they will study and stop rag picking. MMCT paid Rs10700/ for admission fees, purchase books, school bags, shoes, and uniforms to enroll these 3 daughters in school. Total expenditure: 10700/

Admission fees...Total =4110/

School book, copy. dress,tie,sucks,belt Total=1950/

School diary..150

Shoe..750/

Raincoat..700/

Colour pencil 100/

Books from outside...1000/

School bag..500

MMCT is thankful to the school principal for their helping hand by allowing for the admission of these 3 girls who are continuing their studies.

GIRL CHILD EDUCATION

Education is the pillar every human being. No one can get success without education. We called uncivilized if we are illiterate...so MMCT arranged a meeting for the mothers those who ignore education and don't allow their girls for higher education.

A girl became a woman and will manage a family. The whole family depends on her for each and everything. Starting from her children to her inlaws.an educated women drive the family in a right path cause. She is educated.but a illiterate women will never drive her family in a right path.the thinking level,the acceptance level.,the outlook, broadness of a educated and uneducated is completely different. It just likes east and k.

An educated lady always careful about her children study but it seems different in uneducated lady.

So MMCT creating awareness among the illiterate and semi illiterate women

TEACHERSS DAY CELEBRATION

ON Date: 5.9, 2013teachers day program was organized at: Akhadakoch School where 60 participants had participants. Children were taught about the importance of the teachers day and what respect teachers need from society and children was taught to the participants.

The school authorities and teachers were very happy to see that MMCT has organized the program to bring changes among the pupils and parents

ADULT EDUCATION

MMCT has been insisting on the adult education of the mothers of the slum children. Awareness has been given to the parents on the need of the education but the parents are engaged in daily work .many of them go out to work as a wage laborer. Some of the mothers go to work in others house as maid servants. Mariyam and other few women learnt how to write their names.

MMCT has started adult women education with Mariyum, 45, mother of Aliah, Neeha and Khusbu.

When MMCT does tuition to the kids same time mariyum also learning to write.

MORAL EDUCATION

Life in slims is very challenging ... children do not get good atmosphere to learn good things which will make them better citizens. Most of the children are school drop outs and they engage in manual labor or child labor in various shops, hotels, and other places where they learn all immoral things but Regular interaction with

children enabled them to learn moral values. As it is very difficult to change the children's behavior yet some changes have been noticed among the children.

It is very important to know how to behave at school, house, market place, village, to elders, youngsters , friends, boys, old person, to beggars., to poor's, to widow, to orphan, to destitute, police, driver, doctor, traffic man, rickshaw man, bus conductor, maid, neighbor ,to a drunkard, to a shop keeper, to gate keeper,

GIRL CHILD EDUCATION

FREE TUITION

AS the children work as child labor in hotels, shops and various places

they miss their schools and few children they go to others houses to work as a maid. The children leave their houses early in the morning and return to home after their work and

go to schools and again after returning from work they again go to

work as maid servant in the evening. MMCT has arranged free tuition for the children who are weak in various subjects. The tuition facility is a great help for the children as many of them have improved in their studies.

SPORTS FOR DEVELOPMENT

Children are the future citizens. They need to be educated and healthy and physically fit. Sports is one of the platforms which brings children together and help them to stay united. Children are like clay so they need to be trained properly from the child hood. So that they can build their better health and learn some sports also. MMCT organized volley tournament for the children where 8 teams participated to play league match. For the league tournament children had to practiced the game so they have to stay united so they can gather to practice the game.

IMPORTANT DAY CLEBRATION

MMCT has organized important days celebrations throughout the year so that the slum dwellers and

children can feel the importance of the important days. Community people and children have actively participated in

the celebration of these important days s important day like, Republic day on January 26th, March 8 International woman’s day, children day on November 14, National voter’s day’s .Republic day on 26 January.

International children day on Date: 20.11.2013, girl child day on 25.11.2013, international day Violence against women on

Date: 25.11.2013 On the occasion of the

international children day all children were encouraged and told "The one thing all children have in common is their rights. Every child has the right to survive and thrive, to be educated, to be free from violence and abuse, to participate and to be heard which has created great awareness among the children and they promised to thrive in their lives. On the occasion of national voters day all people were encouraged to

exercise their most valuable weapon that is casting votes to select their leader to give better government because The National Voters day aims to spread awareness among voters' regarding effective participation in the electoral process. The objective of the program is also to increase enrolment of voters. MMCT organized and observed the republic day on 26.1.2014 with the children from Jihova Nishi Children Home at Sundergarh where the Director Susmita Pradhan had hoisted the flag and gave encouraging speech to the children about the importance of the celebration of republic day

| | 20.8.2013 | Sam long | <p>Cancelling Mariyum : Meet a grief Mother & Counseling to Miriam after her daughter's death Today was the wonderful and blessings day for me. I stunned to hear the death story of Mariyum's elder daughter. who was studying class 10 at a missionary convent school hostel in Jharkhand state. She was very depressed and upset due to her daughter's sudden death. I tried to counsel her...and said few Gods word.</p> <p>Mariyum is the maid of our apartment. Daily he came here for sweeping, dusting etc...</p> <p>When I was talking with Mariyum..I heard creaming of children, then found there are the three baby girls of mariyum playing at the parking area.</p> <p>My heart was melted to see Mariyums condition, as a mother and a woman I felt her pain both physically and mentally.</p> <p>Then I called to kids inside my house, gave some snacks and then I switched on TV. With fear and consciousness they entered inside my house</p> | | |

As this is the first year of it program implementation we could not implement many programs as planned as we did not have enough fund to carry out all program. However we have a good learning which we had experienced during the annual review of our program and we have decided to take corrective measures in the coming year so that the wholistic development which we have been attempting for will be successful.

We thank all our stake holders mainly government mechinaries at local level e.g. Local ICDS centers and Angagenwadi centers , primary and high schools and local health department of Bolangir, Kandhamal (Gudayagiri) and Ranchi.

We are happy to acknowledge our sincere thanks and appreciation to all our friends, well wishers and donors for their moral and financial support, encouragement and assistance to make our aspirations and programs a reality. We also acknowledge our thanks to all board members, volunteers, resource persons, consultants, advisors and collaborators in the field of development.

Thank you once again

Mrs. Susmita Pradhan.

Chairman cum Director.

MMCT
